DETAILED ACTION

The indicated allowability of claims 1-3, 11, 14-19, 41-43, 46 and 47 is withdrawn in view of the newly discovered reference(s) to Hickey, U.S. 6,266,465 and Malone, U.S. 5,941,308. Rejections based on the newly cited reference(s) follow.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Hickey, U.S. 6,266,465.

Hickey discloses in figure 1 a wellbore junction (col. 2, lines 7-11) having longitudinally extending branches or bores (10,12) at a web or junction (30) and a casing (32); wherein the casing and junction are configured to resist 10,000 psi (col. 3, lines 7-15).

Claims 11, 14-19, 41-43, 46 and 47 are rejected under 35 U.S.C. 102(b) as being anticipated by Malone, U.S. 5,941,308.

Regarding claims 11 and 14-19, Malone discloses in figure 2 a segregator (30) junction having a first portion connectable to a drill pipe (col. 6, lines 6-9) and a sealingly

Art Unit: 3672

(40) connected to a conduit (24); the junction having first (37) second (38) and third (39) bores in communication with the conduit. Below the first portion, Malone discloses a second portion between a pair of seals (40, 41) having the second (38) and third (39) bore and a lateral exit and deflector (21) of the first (37) bore. Below the second portion, Malone discloses a third portion between a pair of seals (41, 42) having the third bore (39), substantially parallel to the conduit (24), and a lateral exit and deflector (22) of the second bore (38).

Regarding claims 41-43, 46 and 47, Malone discloses a wellbore segregator junction (30) having first, second and third bores (37-39) positioned in an under reamed cavity (15) of a fourth vertical wellbore (10) having first, second and third (L-1, L-2, L-3) casing strings sealing (col. 5, lines 13-46) disposed in first second and third lateral wellbores (25-27). Malone discloses a fourth tubular string (16, 24) in communication with the bores of the junction

Claims 33 are rejected under 35 U.S.C. 102(b) as being anticipated by Gardes U.S. 5,680,901.

Gardes discloses in a plurality of wellbore junction assemblies (10), each having a first (73) isolated bore and a plurality of second, third and fourth (40) bores in communication across junctions (col. 7, lines 1-10).

Allowable Subject Matter

Claims 22-27, 29-32 and 36-39 are allowed.

Claims 4-10, 12-13, 20, 21, 34, 35, 44 and 45 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record does not disclose or suggest all the claimed subject matter including the wellbore junction pressure rating and connected tubing strings.

The prior art of record does not disclose or suggest all the claimed subject matter including the wellbore junction pressure rating and radial bore spacing.

The prior art of record does not disclose or suggest all the claimed subject matter including wellbore junction pressure rating the plurality of junctions.

The prior art of record does not disclose or suggest all the claimed subject matter including the plurality of junctions and an under reamed cavity.

The prior art of record does not disclose or suggest all the claimed subject matter including the plurality of junctions and connected tubing strings.

Response to Arguments

Applicant's arguments with respect to claims 46 and 47 have been considered but are moot in view of the new ground(s) of rejection.
